

Meet the characters

Join Biff, Chip, Kipper and friends as they explore experiences that your children will relate to.

Stories based around a set of characters are highly motivational as children empathise with them, love reading about them and cannot wait to find out what happens to them in the next story!

Biff and Chip

Biff and Chip are twins. Biff likes playing football and going swimming. She is always ready to join in with games and likes making things. Chip enjoys cycling, sports and drawing.

Kipper

Kipper likes to play with Biff, Chip and Floppy. His real name is Christopher, but when he was learning to talk he couldn't say Christopher. Dad decided that the name Kipper suited him so everyone calls him Kipper.

Nadim and Anneena

Nadim and Anneena are brother and sister. They go on adventures with Chip and Biff.

Floppy

Floppy is a big sappy dog. He loves playing with a stick or ball and running all over the place. He loves to dig holes or to go for a swim in the pond. He often ends up covered in mud.

Mum and Dad

Dad likes playing games and trying to trick Biff, Chip and Kipper. He always tries to help, but things don't always turn out as he intends. Mum likes playing sports and taking Floppy for long walks. She is very good at DIY and can fix almost anything!

Lee and Lin

Lee and Lin live next door to Biff, Chip and Kipper. Lee likes playing outside, camping and gadgets. Lin loves to read with Lee or Grandpa Chen and play with Button her dog.

Wilf and Wilma

Wilf and Wilma live two doors away from Biff and Chip so it is easy for them to play together after school and at weekends.

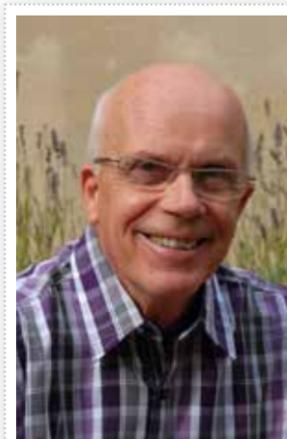

Gran

Gran is Mum's mother. She loves coming to visit and spending time with her grandchildren, but she is always getting into trouble!

Meet the Authors

Roderick Hunt MBE

Alex Brychta MBE

Roderick Hunt and Alex Brychta are the award-winning author and illustrator team who together created *Oxford Reading Tree's* best-loved characters and stories. These stories are used in more than 130 countries worldwide and have been used to teach millions of children to read.
