

Maths Opportunity!

Research the population of any European country. How has this changed over time? Has it increased or decreased? Create a chart of your choice showing what you have found. For example it could be a bar chart showing the changes in the population of France over the last 10 years.

Art opportunity!

Using materials of your choice create a 3D model of any famous world landmark that inspires you. It could be a model of the Taj Mahal made of Lego!

Writing opportunity!

Read a native American myth or story and rewrite this in your own words. You could even present this artistically in a story board format.

Earth Explorers!

KS2 Homework Tasks

Music opportunity!

Listen to some music written and performed by an American artist or band. Choose some of your favourites to help you design your very own album cover for someone on an American road trip.

Autumn Term

History opportunity!

Using articles or the internet create a fact file all about a past American president of your choice!

Please choose any 2 of the tasks that you think you will enjoy to complete at home in the Autumn Term. The tasks are due in on or before Monday 10th December.

We are planning to exhibit all your wonderful home-learning after school on Friday 14th December and before school on Monday 17th December.

Thank you!

Mrs Meredith, Mrs Barnett and Miss Snook

Design and Technology Opportunity!

Get cooking! Create a traditional recipe from a country in Europe. You may create Spanish Paella, Italian Pizza or even Greek Moussaka! Take some photographs of you making (or eating) your delicious creation to go alongside the recipe.
