

YEAR GROUP NEWS

5th October 2018

Reception

This week the children have been learning to put objects in order using the language of tallest and shortest. Dave and Steve the giraffe handlers wanted to put their giraffes in order by their height but they kept getting them mixed up! The children helped them by putting the giraffes in order from tallest to shortest.

We have also been exploring what a hunt is as next week we will begin to read the story We're Going on a Bear Hunt. The children have been looking for different animals in the school's Secret Garden where lots of animals had got lost. See if the children can tell you which animals they found there.

We have been practising mixing colours together to make a new colour using our hands to print with.

In phonics we have practised the sounds we have already learnt and we also learnt three new sounds, these have been added to your sound packs.

YEAR 1

We have been practising how to keep our minds and bodies happy by doing yoga in class.

We have been working on different yoga poses into a vinyasa. We were very good at keeping our concentration when practising these moves. You could have a go at practising these at home over the weekend. We have been using Cosmic Kids for ideas; you can watch some of their videos on Youtube.

YEAR 2

This week the Year 2 children enjoyed Dino Day! They spent the morning making fossils, constructing model dinosaurs and drawing ammonites. We then had an amazing trip to see Dino World live at the theatre. The children did us proud with their exceptional behaviour and learned lots about dinosaurs. There are some photos on the Year 2 page on our website.

Please join us next Thursday, 11th October at 2:30pm for an informal workshop about how to help your child at home with their English and Maths. Mr Mortimer and Mrs Ruddick will be available for any questions you have. We hope to see you all there.
