

# Emotion Processing in Faces and Objects

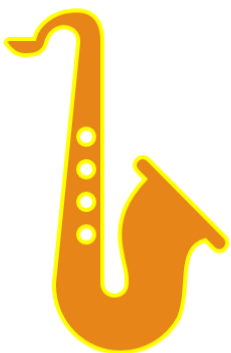

## Who can participate?

- Native **English** speakers aged **7-60**
- With a diagnosis of **High-Functioning Autism/Asperger's Syndrome**
- OR without a diagnosis and sings **well** or **out of tune**
- With no known visual, hearing or speaking difficulties
- With no known psychiatric or neurological conditions

## What is the study about?

We are interested in how different cognitive and pitch processing styles influence the way people perceive emotions.

## What will be involved?

On an emotion recognition task, you will be identifying the emotions expressed in faces and face-like objects while listening to some speech and musical sounds, lasting for approximately 45 minutes.

**You will be reimbursed for all travel expenses and receive £7.50 per hour!!**

If you fulfil our requirements and are interested in participating in our research, please sign up at
