

Long Term Plans Autumn 2018 'Dinosaurs'

Subject

Theme

Maths

The mathematics content will mainly focus on place value and calculation this term (addition and subtraction).

English

English reading and writing will use the Dinosaur theme as a basis to write reports, explanations and narratives based on children's books involving dinosaurs. In reading children will examine a number of text types involving dinosaurs where possible.

History

Children will examine time lines and research into the past looking at different dinosaurs. The children will use their writing and reading skills to present information they have found out about their research.

RE

Places of worships including a Christian Church and a Jewish

Synagogue

PE

Team Games

Geography

Children will create a 'Jurassic Park' and use the vocabulary of physical geographical features to create it. They will also examine continents with reference to different dinosaur discoveries.

Art

Using the work of abstract artists to look at pattern and colour.

Children will experiment with different media and mixing that media.

DT

The children will create a toy buggy based on a Christmas theme. They will examine the mechanism of axle and wheels and how to make the structure stronger.

Science

Year 2 Seasonal changes and habitats

Year 1 Animals including humans

Internet Safety

Computing

Sending an email

Music

The children will examine different pieces of music and learn about high sounds and low sounds.
