

St Anne's School and Sixth Form College

Procedures for handling bomb threats

This policy was adopted in the Autumn term 2018

1. INTRODUCTION

The vast majority of bomb threats are hoaxes designed to cause alarm and disruption. As well as the rare instances of valid bomb threats, terrorists may also make hoax bomb threat calls to intimidate the public, businesses and communities, to draw attention to their cause and to mislead police. While many bomb threats involve a person-to-person phone call, an increasing number are sent electronically using email or social media applications.

No matter how ridiculous or implausible the threat may seem, all such communications are a crime and should be reported to the police by dialling 999

It is important that potential recipients - either victims or third-parties used to pass the message - have plans that include how the information is recorded, acted upon and passed to police.

2. THE BOMB THREAT MESSAGE

Bomb threats containing accurate and precise information, and received well in advance of an actual attack, are rare occurrences. Precise motives for hoaxing are difficult to determine but may include revenge, extortion, a desire to impress, or a combination of these and other less understandable motives. The vast majority of cases are hoaxes and the intent is social engineering, to cause disruption, fear and/or inconvenience the victim.

3. COMMUNICATION OF THE THREAT

A bomb threat can be communicated in a number of different ways. The threat is likely to be made in person over the telephone; however, it may also be a recorded message, communicated in written form, delivered face-to-face or, increasingly, sent by email or social media (e.g. Twitter or Instagram, etc.). A threat may be communicated via a third-party, i.e. a person or organisation unrelated to the intended victim and identified only to pass the message.

4. IMMEDIATE STEPS IF YOU RECEIVE A BOMB THREAT COMMUNICATION

Any member of staff with a direct telephone line, mobile phone, computer or tablet etc., could conceivably receive a bomb threat. Such staff should, therefore, understand the actions required of them as the potential first response to a threat message.

If you receive a telephone threat you should:

- stay calm and listen carefully
- have immediate access to a checklist on key information that should be recorded ([see bomb threat checklist - attached](#))

- if practical, keep the caller talking and alert a colleague to dial 999
- if displayed on your phone, note the number of the caller, otherwise, dial 1471 to obtain the number once the call has ended
- if the threat is a recorded message write down as much detail as possible
- If the threat is received via text message do not reply to, forward or delete the message. Note the number of the sender and follow police advice
- notify senior staff and site manager; they will need to make an assessment of the threat
- contact the Local Authority Helpline on **01482 392999** (manned 24 hours a day for the purpose of critical incidents, but not for general school closures)

If the threat is delivered face-to-face:

try to remember as many distinguishing characteristics of the threat-maker as possible

If discovered in a written note, letter or as graffiti:

treat as police evidence and stop other people touching the item

If the threat is received via email or social media application:

do not reply to, forward or delete the message

note the sender's email address or username/user ID for social media applications

preserve all web log files for your organisation to help the police investigation (as a guide, 7 days prior to the threat message and 48 hours after)

REMEMBER Dial 999 and follow police advice. Seek advice from the site manager as soon as possible

5.ASSESSING THE CREDIBILITY OF BOMB THREATS

Evaluating the credibility of a threat is a critical task, particularly if the attack being threatened is imminent. This is a tactic used to place additional pressure on decision makers. Police will assess the threat at the earliest opportunity. When specific intelligence is known to police, advice will be issued accordingly; however, in the absence of detailed information, it will be necessary to consider a number of factors:-

- is the threat part of a series? If so, what has happened elsewhere or previously?
- can the location of the claimed bomb(s) be known with precision? If so, is a bomb visible at the location identified?
- considering the hoaxer's desire to influence behaviour, is there any reason to believe their words?
- if the threat is imprecise, could an external evacuation inadvertently move people closer to the hazard?
- is a suspicious device visible?

6.ACTIONS TO CONSIDER

Responsibility for the initial decision making remains with the management of the location being threatened. Do not delay your decision making process waiting for the arrival of police. Police will assess the credibility of the threat at the earliest opportunity. All bomb threats should be reported to the police and their subsequent advice followed accordingly. It is essential that appropriate plans exist, they should be event and location specific. Venue options to manage the risk include:-

External evacuation

Leaving the venue will be appropriate when directed by police and/or it is reasonable to assume the threat is credible, and when evacuation will move people towards a safer location.

Internal or inwards evacuation ('invacuation')

There are occasions when it is safer to remain inside. Staying in your venue and moving people away from external windows/walls is relevant when it is known that a bomb is not within or immediately adjacent to your building.

Decision not to evacuate or inwardly evacuate

This will be reasonable and proportionate if, after an evaluation by the relevant manager(s), the threat is deemed implausible (e.g. a deliberate hoax). In such circumstances police may provide additional advice and guidance relating to other risk management options. It may be considered desirable to ask staff to check their immediate surroundings to identify anything out of place, see search considerations below.

Checking your venue for suspicious items - Search considerations

Regular searches of your establishment, proportionate to the risks faced, will enhance a good security culture and reduce the risk of a suspicious item being placed or remaining unnoticed for long periods. Additionally, if you receive a bomb threat and depending upon how credible it is, you may decide to conduct a 'search' for suspicious items.

- ensure plans are in place to carry out an effective search in response to a bomb threat
- identify who in your venue will coordinate and take responsibility for conducting searches
- ensure those conducting searches are familiar with their areas of responsibility. Those who regularly work in an area are best placed to spot unusual or suspicious items
- focus on areas that are open to the public; enclosed areas (e.g. cloakrooms, stairs, corridors, lifts etc.) evacuation routes and assembly points, car parks, other external areas such as goods or loading bays
- under no circumstances should any suspicious item be touched or moved in any way. Immediately start evacuation and dial 999
- ensure all visitors know who to report a suspicious item to and have the confidence to report suspicious behaviour

Familiarising through testing and exercising will increase the likelihood of an effective response to an evacuation and aid the decision making process when not to evacuate/invacuate.

7.MEDIA AND COMMUNICATION

Avoid revealing details about specific incidents to the media or through social media without prior consultation with police. Do not provide details of the threat, the decision making process relating to evacuation (internal or external) or why a decision not to evacuate was taken.

Releasing details of the circumstances may:

- be an objective of the hoaxer and provide them with a perceived credibility
- cause unnecessary alarm to others
- be used by those planning to target other venues
- elicit copycat incidents
- adversely affect the subsequent police investigation

8.REVIEW

This policy will be reviewed annually or as local / national guidance changes.
