Consolidation
Overview

Small Steps

- Add decimals within 1
- Subtract decimals within 1
- Complements to 100
- Add decimals – cross the whole
- Add numbers with the same number of decimal places
- Subtract numbers with the same number of decimal places
- Add numbers with different numbers of decimal places
- Subtract numbers with different numbers of decimal places
- Add and subtract wholes and decimals
- Decimal sequences
- Multiply decimals by 10, 100 and 1,000
- Divide decimals by 10, 100 and 1,000

NC Objectives

Solve problems involving number up to three decimal places.
Multiply and divide whole numbers and those involving decimals by 10, 100 and 1000
Use all four operations to solve problems involving measure [for example, length, mass, volume, money] using decimal notation, including scaling.
Overview
Small Steps

- Measure angles in degrees
- Measure with a protractor (1)
- Measure with a protractor (2)
- Draw lines and angles accurately
- Calculate angles on a straight line
- Calculate angles around a point
- Calculate lengths and angles in shapes
- Regular and irregular polygons
- Reasoning about 3D shapes

NC Objectives

Identify 3D shapes, including cubes and other cuboids, from 2D representations.

Use the properties of rectangles to deduce related facts and find missing lengths and angles.

Distinguish between regular and irregular polygons based on reasoning about equal sides and angles.

Know angles are measured in degrees: estimate and compare acute, obtuse and reflex angles.

Draw given angles, and measure them in degrees (°)

Identify: angles at a point and one whole turn (total 360°), angles at a point on a straight line and ½ a turn (total 180°) other multiples of 90°
## Overview

### Small Steps

- Position in the first quadrant
- Reflection
- Reflection with coordinates
- Translation
- Translation with coordinates

## NC Objectives

Identify, describe and represent the position of a shape following a reflection or translation, using the appropriate language, and know that the shape has not changed.
### Overview

#### Small Steps

</tbody>
</table>

### NC Objectives

Convert between different units of metric measure [for example, km and m; cm and m; cm and mm; g and kg; l and ml]
Understand and use approximate equivalences between metric units and common imperial units such as inches, pounds and pints.
Solve problems involving converting between units of time.
What is volume?

Compare volume

Estimate volume

Estimate capacity

NC Objectives

Estimate volume [for example using 1cm³ blocks to build cuboids (including cubes)] and capacity [for example, using water].

Use all four operations to solve problems involving measure.
