The Jungle Book

It was seven o'clock on a very warm evening in the Seonee hills. Father wolf woke up from his sleep, and then he started to stretch while mother wolf was on the ground. The four noisy cubs were playing with their mother next to her.

The Jackal (Tabaqui) causes a lot of trouble, one day he went to look inside the cave where the wolves were. But all that Tabaqui saw was a deep empty pit. So he had to go somewhere else to find food.

Whilst father wolf was hunting he got really angry just all because he couldn't change places of where he could hunt. Though he pictured something in his head that he would have to hunt in the same spot where father wolf should hunt.

Father wolf heard a strange noise behind the bushes and he was getting really angry because he scared away the animals which were the only food they have to share. So father wolf was about to go home to his family but the noise stopped with a loud roar that nearly scared every single animal that is in the jungle.

So father wolf went to look around where the strange noise was "N-no th-this i-is n-not hap-happening." Father wolf said in a panicking way. "I better warn the others before it looks around the whole jungle." What do you think is in the jungle?
