

## The Haven Science Vision

At the Haven School, we are working towards the Primary Science Quality Award (which we have previously held). It's achieved through evidencing high-quality, inspiring teaching and learning of Science.

In our school, we believe in using an investigative and practical approach to Science teaching. The pupils are given the opportunity to scientifically observe and explore the world around them inside the classroom and beyond. Pupils have regular beach trips where they learn about the impact humans and nature have on our environment, and we have a wonderful nature area where pupils observe a variety of local wildlife – from sparrowhawks to large-legged flower beetles. They also have the opportunity to grow and examine plants like lettuces and sunflowers. The engagement of Haven pupils with the scientific wonders of nature, is enriched through our Christian values of Respect, Responsibility and Compassion for the world around us.
