

Intent

Knowledge Rich

Our Curriculum aims to respect the subject disciplines from a broad and balanced range of subjects. We ensure that knowledge content is specified and pupils know what knowledge is expected of them to learn. Teachers ensure that knowledge is taught to be remembered and not merely encountered. At the Friars Primary School, the Curriculum is carefully sequenced and mapped out deliberately.

Here at the Friars Primary School we want our Curriculum to be memorable

We believe that a Curriculum should be memorable; or rather worth remembering. Each subject and theme is carefully chosen to help enrich and secure enduring memories of learning at our school.

Our Curriculum is Enquiry Led

At the Friars Primary School, our aim is to allow children to question and make sense of the world around them. We have carefully structured our Big Question Curriculum to allow for critical thinking, communication, collaboration and creativity. Through our demanding Learning Challenges, our pupils learn to make sense of the past, present and future.

Purposeful

The children of the Friars Primary School are unique and special to us; therefore we believe in allowing children's natural curiosity and interest to take a lead in teachers' planning. We aim to well prepare them for their future aspirations, but make learning relevant to the immediate world around them.
