

Dear Parents

This has been a great week for Nursery. The children have been learning a lot about Chanukah and all off its traditions. We even created our own doughnuts with salt dough! It was amazing. We made icing with puffy paint and the children were really creative and loved mixing different colours. We also looked for shapes in our environment, matching them with the mathematical ones. We loved hunting for them! We have been also working with the Codapillar, a little technological caterpillar that develops early coding skills. The children have to add the segments which have different commands and make it go from a point to another. It was amazing! We also had a musical session with Einav. So much fun!

This week Nursery learnt to say לֹא (Lo – no) נָעִים מְאֹד (Naim meod – nice to meet you). The class enjoyed beginning to learn about Chanukah and learnt the song סְבִיבֹן סוֹב סוֹב סוֹב (Sevivon sov sov sov – dreidel spin spin spin). You can find the song we learnt at <https://www.youtube.com/watch?v=Oh1xNFsrMoA>

Next week we will start with the sound of the week as the children are really interested in letters. The first sound to work is S. Would be great if you could send in with the children objects that start with S like sock, snake, soup etc.

Watch this Space!

We are fundraising through Rocket Fund to develop our resources in Computing. Please watch out for the email next week which will enable you to click on the link and help us meet our target to buy resources to support the children's learning! Please share with family, friends and colleagues.

Thanks for your help

The Nursery Team
