

English

In English, we will be reading the story Mama Mitu. The children will elaborate on the narrative, adding their own twist to the story to give it an adventurous element. They will then write their own newspaper articles about the problems that arise in the story.

Maths

In maths, the children will apply their understanding of fractions to make links between decimals and percentages. We will then move on to measures, where the children will need to apply calculation skills to convert between measures.

RE

Following on from our previous science topic (evolution), the children will study different creation stories. We will focus on the Christian creation story in genesis. They will also weigh up how well humans are responding to taking responsibility for the earth, taking into account religious and non-religious viewpoints.

French

In French, we will be learning increasingly larger numbers and how to talk about ourselves and our family.

Computing

This term, the children will have lots of opportunities to research topics online. They will create their own Powerpoint presentations to share their research with the class.

They Made a Difference

Year 6 Term 3

Value of the Term: Love

Learning to Learn Skill: Creative

PSHE

Throughout Term 3, the children in Year 6 will be reflecting on their hopes and dreams. We will consider how resilience, positivity and motivation can have an impact on these.

Hooks and Experiences

The children will be watching a documentary about Malala and we will be inviting in some inspirational speakers.

Science

The children in Year 6 will be learning more about light. As part of this, they will make detailed investigations of shadows, using their conclusions from this work to create shadow puppets. The children will also study reflectivity and learn about the dangers of UV light.

Thematic Curriculum (History and Geography)

Whilst focusing on inspirational people, we will be describing how some of the events and people studied from the past can affect and influence life today. We will be using maps, atlases and google earth to locate and compare places in the world, including looking at the similarities and differences of where we live and where Malala was brought up. The children will reflect on how they can make a difference in their own lives and the impact this could have. We will focus on how individuals have used our learning to learn skills to succeed.

Health and Well-being (Art, Music, Sport)

In sport, the children will develop their gymnastics skills. They will also continue to develop fundamental movement skills through the use of Real PE.

In music, the children will be learning songs and music from a range of countries (from South Africa to Israel) will lead Y6 to think how music unites and can reflect social change.

In art, the children will be learning about significant artists and creating art in their style.
