

## English

In English this year we will be looking at our theme of love and forgiveness through a number of different novels and stories. Pride and Prejudice, The boy in Striped Pyjamas and The Prodigal Son.

We will be starting with information texts which doesn't link naturally to this theme so we are going rogue and looking at Fantastic Beast and Where To Find Them. I think the children will enjoy researching different beasts and creating their own information books.

## Maths

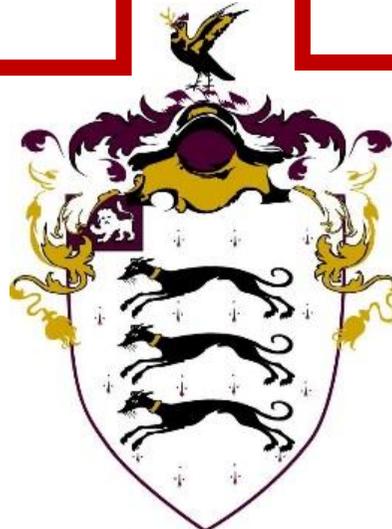

We will be starting a revision programme towards the end of the term but will start with looking at shape, coordinates, translation.

We will also re-visit proportionality (fractions decimals and percentages)

Boosters will continue on Friday morning at 8am with myself, Mr Wilkinson and Mrs Carpenter

## Science

In science we will be looking at electricity and circuits. The children will learn the different symbols for electrical components and will be able to identify and make series and parallel circuits.

**Oaks: Spring 1**

**Love and forgiveness**

## RE

In this unit we consider Love and forgiveness and question what it means if God is holy and loving. We will be looking at extracts from the Old Testament and considering the architecture of Cathedrals to reflect the Christian belief that God is holy and forgiving.

## ICT

We will be learning how to stay safe on social media and how to share information safely.

## Art

Art will be taught as part of our Topic and English curriculum. Children will be creating their own fantastical beast in English, in Topic they will be looking at the graffiti that was written on the Berlin Wall. In RE they will be studying the Sistine Chapel and religious artwork.

## Topic

We will be following a topic of "Through the Barricades." We will be looking at the Northern Island troubles, The Berlin Wall and the Gaza Strip. This is linked closely to our theme of Love and Forgiveness.
