8th January 2019

Dear Parents/Guardians

ROCKS AND FOSSILS WORKSHOP Friday 25th January 2019

As part of our topic work this term we have an opportunity to learn more about rocks and fossils. Thanks for a small grant from the Edina Trust, the Oxfordshire Geology Trust is able to offer local primary schools an engaging practical class, to handle rocks and fossils and explore some simple geological concepts. An emphasis will be placed on rocks and fossils that were collected in Oxfordshire that represent the conditions that existed in the county over 160 million years ago.

Activities will include:-

- Examination of different rock types (sedimentary, igneous and metamorphic) and studying different properties such as colour, density, hardness, porosity etc.
- Studying fossils and their significance in terms of where they lived, their age and how they are preserved including a section on the evolution of fossils.

The Oxfordshire Geology Trust ask for a small donation (£1.67 per child). Please pay for this via ParentPay.

If your child has any medical conditions that will affect their enjoyment of this workshop please complete the slip below and let your classteacher know.

Please pay for this activity by 18th January 2019.

Kind regards

Gemma Fowkes and Ashley Francis
Year 3 Classteachers
