

Design & Technology at JFCPS

Mission Statement

“To be the best that we can be.”

Curriculum Overview for Design & Technology

At Johnson Fold, we aim for Design and technology to be an inspiring, practical subject. Using creativity and imagination, pupils will learn to design and make products that solve real and relevant problems within different contexts, considering their own and others’ needs, wants and values. They will acquire a broad range of subject knowledge and learn to link skills from other areas of the curriculum, such as mathematics, science, engineering, computing and art.

Pupils will learn how to take risks and become resourceful, innovative, enterprising and capable citizens. Through the evaluation of past and present Design and technology, children will develop a critical understanding of the impact of Design and technology on daily life and the wider world. Children will also learn to understand and apply the principles of nutrition and learn how to cook. We are very lucky at our school that all children have access and the opportunity to apply their cooking skills in the school kitchen purpose built for children. Each child will produce 3 healthy meals a year.
