

## **Educational Psychologist's Team**

Our current Educational Psychologist is called **Jo Spragg**.

Donna helps children throughout the school with a range of issues that affect their learning, for example, learning, concentration, attention and/or social communication and interaction.

As there can sometimes be confusion (and even fear) about the role of an Educational Psychologist, it is worth explaining that, in short, the purpose of a school seeking support from an Educational Psychologist is so that she can contribute to the identification and assessment of a child's needs and recommend strategies and support arrangements which will enable the child to make progress.

### **Referring a child to the Educational Psychologist's Team:**

The school normally contacts the Educational Psychologist's Team directly on your behalf or alternatively you can contact them yourself by telephone, email or letter at any time.
