

Maths

NSPCC Numbers Day last week was a great success! As well as raising money for an important charity, we did lots of fun maths activities. The teachers all had numbers on their backs and the children worked as a team to solve problems involving these numbers. Good work year 2!

Topic - Geography

We have been learning about the continents of the world. The class worked in teams to create a world map, including labelling the main oceans.

Class Assembly

We all hope you enjoyed our class assembly last week. The children have enjoyed putting it together and I know they were excited to share their learning with you. I was very impressed with how clearly they all spoke.

FEELING GOOD WEEK 2019

Feeling Good Week 11th-15th Feb

Next week is *Feeling Good Week*! As well as our normal lessons, we will participate in some fun and relaxing activities.

On Wednesday afternoon we will have an outing to the woods. Please can you provide **wellie boots** (named, in a plastic bag) and a **waterproof coat**.

TT Rock Stars

It has been a busy few weeks with battles against year 3 and year 4. Well done all of you - a large proportion of the class contributed to some fantastic scores!

Reminders

The **science homelearning** is due next week - prepare a short talk about a habitat and the plants and animals that live there. You can bring a script, notes or a poster to support your talk.
