

Willow Class blog January to February Half-Term

Our new topic is Explorers and so we learnt about Robert Falcon Scott. We were also reading the Polar Bear Explorers' Club. We wrote diary entries for real people but also for fictional people. Our book is very good because it has scary parts but it is also

exciting and makes you want to read on.

We love learning Spanish and we learnt colours, how to write the date, how to start a conversation and parts of the body. We like to practise our accents, some of us really look forward to a Thursday afternoon when we can talk in Spanish.

During our PE lessons we have been doing gym and dance. In gym we have been working on a sequence. It is quite difficult to make sure we always have a strong core and remember to point our toes. We all enjoyed using the spring board for vaulting. We have also been

working on a dance to go with our assembly but we will tell you more about that next half term.

In RE we studied prayer and what prayer means to different people. All religions pray differently. We talked about the way people use prayer to communicate with God.

During our science lessons we learnt about habitats. We had long conversations about the Polar Regions and how climate change is effecting the ice caps.
