

11.3.19

Dear Parents,

This week our focus story is 'We're going on a Lion hunt'. We will be retelling the story using Makaton actions, and then using this to write the story. At the end of the week we will be creating a story map and changing parts of the story to create a new version e.g. We're going on a Giraffe hunt etc.

In the creative area we will be creating lions using lots of different media, making camouflage binoculars, creating junk box caves and continue to make our African Masks.

In maths we are going to focus on halving by sharing objects between 2 people. At home this week, please practise halving numbers practically, this could be sharing toys or food between two people using the 'one for you, one for me' method; remember to upload your observations to Tapestry (your child will receive 5 dojo points for this).

I will also be sending home the sponsorship forms for the dance-a-thon so please check your children's book bags.

Thanks for all your continued support.

Mrs Sharp
