1. Situation Update

- The Ukraine Logistics Cluster support team has identified that the limited availability of workers in the commercial logistics sector as one of the main challenges; particular related to securing road transport capacity. The Ukraine Logistics Cluster support team emphasizes the need for stronger coordination among responding humanitarian organizations to mitigate the impact that competition is having on the services available within Ukraine.
- Partners are invited to share all information they may have on physical access constraints with the Ukraine Logistics Cluster support team with ukraine.logisticscluster@wfp.org.
2. Logistics Cluster Concept of Operations (ConOps)

COORDINATION

• The Logistics Cluster for the Ukraine operation was activated four weeks ago and Ukraine Logistics Cluster Coordinators are currently on site in Dnipro and Lviv.
• The Ukraine Logistics Cluster support team is currently mapping partners’ presence/capacity in Ukraine.
• Inter-agency convoys are not organised by the Ukraine Logistics Cluster support team but by an Inter-Agency Working Group. The Ukraine Logistics Cluster support team facilitates cargo prepositioning, consolidates cargo, and provides road transportation for that cargo but is not actively engaged in road crossing procedures for that cargo.
• A decision was taken to set up a health logistics sub-working group to be headed by UNFPA for coordination on any health-related logistics query raised by the humanitarian actors involved in the weekly Ukraine Logistics Cluster coordination meetings.

INFORMATION MANAGEMENT

• The Ukraine Logistics Cluster Situation Report #5 was published on 28 March and can be accessed here.
• A survey has been disseminated to the Ukraine Logistics Cluster mailing list to collect feedback concerning responding organizations presence/activities within Ukraine; meeting participant are encouraged to respond.

SERVICES

• WFP is acting as a Cluster Service Provider for Common Storage facilities; these services are available at no-cost-to-user in the following locations: UKRAINE – Chernivtsi (~1,000 m²), Dnipro (~10,000 m²), Kyiv (~1,000 m²), Lviv (~3,000 m²), Vinnystsia (~4,000 m²); POLAND – Lublin (~10,000 m²); Rzeszow (~4,600 m²). It is recommended to move as much cargo as possible east without delay to avoid congestion at the Lviv warehouse.
  **NOTE:** None of the current warehouses in Ukraine offer temperature-controlled storage space.
• WFP is acting as the Cluster Service Provider for Common Road Transport; these services are available at no-cost-to-user to ship cargo between the current Cluster-managed Common Storage facilities (see above).
• Responding humanitarian organizations wishing to access these services must submit a Service Request Form (SRF) to the Ukraine Logistics Cluster Support Team; the SRF, instructions for the SRF, and Standard Operating Procedures for all available services can be found on the [Ukraine Logistics Cluster webpage](#).
  **NOTE:** SRFs must be submitted at least 48 hours prior to use of service.
• No cargo can be received into Cluster-managed Common Storage facilities, and/or moved via Cluster-managed Common Transport without a consignee; and, in all cases the consignor/consignee are responsible to obtain necessary customs clearance for their cargo.
  **NOTE:** For additional information about the requirements for customs clearance please contact the IMPACCT working group; any information on customs clearance requirements shared through the Ukraine Logistics Cluster is made available for reference purposes only; in all cases responding organizations should confirm the requirements for the movement of their cargo across international borders with their Clearing Agent and/or the relevant national authority.
• Additional Common Storage facilities and associated Common Transport services are planned; the Logistics Cluster support team published a call for proposals with responding humanitarian organizations: any organization willing to act as a Cluster Service Provider should respond to this call. Temperature-controlled storage is an element of the call, and the Logistics Cluster support team has included requirements related to the provision of medical logistics services including storage of pharmaceutical products, as well as the provision of cold chain technology. The Logistics Cluster support team has identified the need for additional warehouse facilities in at least eleven other locations within Ukraine, as well as the need for last mile transportation services. **The call for proposals is open until 8 April 2022.**
Details of the services can be found in the Standard Operating Procedures (SOPs) at the Ukraine Operations webpage hosted on logcluster.org

3. Any Other Business (AOB)

- Mapping exercises in Ukraine are prohibited under martial law and specific permission is required to undertake mapping exercises of road conditions.
- For any specific information about the activities run by the Ukraine Logistics Cluster support team, please contact ukraine.logisticscluster@wfp.org

THE NEXT LOGISTICS CLUSTER COORDINATION MEETING WILL BE HELD ON 6 April 2022
