1. Logistics constraints

- Fuel shortages across the country are impacting the operational capacity of humanitarian organisations, particularly those operating light vehicles. The Logistics Cluster is coordinating with WFP, as lead agency of the Logistics Cluster, as well as supporting Fuel Relief Fund with information sharing on upcoming fuel services. The latest information is:
  - WFP has augmented staffing to address fuel issues, with a dedicated focal point in-country.
  - WFP confirmed that UNHCR has existing agreements with two fuel suppliers. This agreement can also be made available to other UN partners.
  - A short questionnaire on organisational fuel requirements has been disseminated to partners to support operational planning. Further updates on both modalities, processes and timing relating to fuel provision will be provided as soon as available.
  - Partners can contact Ukraine.logisticscluster@wfp.org for further information.
- There are reports of congestion at border crossing points. The Logistics Cluster is working with partners to gather additional information and guidance to be sent to responding organisations. Information on border crossing times can be found here.
- The volatile security situation, particularly in eastern and southern oblasts, is creating difficulties for planning and executing aid delivery, including the forward movement, and staging of humanitarian cargo. The Logistics Cluster is working in close coordination with OCHA to identify partners who have an operational presence in hard-to-reach areas to support the effective delivery of relief items.

2. Logistics operations

OVERVIEW

- As of 15 May, the Logistics Cluster has handled 11,000 m3 of humanitarian cargo on behalf of 23 partner organisations. Cargo comprises relief items from multiple sectors, including General programs and operations, food security, health, nutrition, shelter, and WASH.
- The Logistics Cluster has updated its Concept of Operations (ConOps). Further revisions may take place following the conclusion of the current Gaps and Needs Analysis exercise.
- A guidance document providing an overview of the common services available to the humanitarian community facilitated through both the Logistics Cluster and HI-Atlas Logistique will be shared with partners. The Logistics Cluster and HI-Atlas Logistique teams continue to coordinate closely.

TRANSPORT

- Iberia airline are offering an in-kind flight for the transport of humanitarian cargo between Spain and Poland at the end of May, in support of organisations responding to the Ukraine crisis.
- For the period 7-13 May, the Logistics Cluster facilitated the transport of humanitarian cargo dispatched from Dnipro (Ukraine), Debica (Poland), Lublin (Poland), and Lviv (Ukraine). Items transported included early recovery, health, nutrition, shelter, and WASH.

https://logcluster.org/ops/ukr22a
The Logistics Cluster is facilitating transport to and from Dnipro to Mykolaiv in support of distributions to southern areas. Partners are asked to identify and liaise directly with organisations providing last mile deliveries to confirm feasibility of receiving cargo in Mykolaiv prior to requesting services.

**STORAGE**

- For the period 7-13 May, cargo was received for storage in Dnipro, Kropyvnyts’kyi, Kyiv, Lviv and Odesa in Ukraine, as well as Rzeszow in Poland.
- Based on identified needs, the Logistics Cluster has expanded common storage services, facilitating access to warehousing in Ternopil. Overall, the cluster, through WFP, is facilitating access to approximately 35,000 m2 of storage space to the humanitarian community in nine locations across both Poland and Ukraine.

### 3. Coordination and Information Management

- The Logistics Cluster holds coordination meetings every Wednesday, 16:00 Kyiv time. Minutes from the last meeting (11 May) can be found [here](#).
- The Dnipro coordination cell is organising in-person coordination meetings. Partners operational in Dnipro can reach out to [ukraine.logisticscluster@wfp.org](mailto:ukraine.logisticscluster@wfp.org) to be added to the mailing list.
- An overview of Logistics Cluster operations for April has been published; available [here](#).
- A ‘mini’ Logistics Cluster Induction Training was held on 12 May. The virtual event, attended by 40 participants, provided an opportunity for partners to ask questions and familiarise themselves with the Logistics Cluster, its mandate and how it operates in Ukraine.
- The Logistics Cluster has launched a pilot warehouse survey as part of its Logistics Information Exchange (Log:IE) platform. This survey aims to collect information on current storage capacities for humanitarian organisations responding to the Ukraine crisis, to help strengthen operational coordination between agencies and reduce duplication of effort. Partners can contribute relevant information by completing the online form; please reach out to [Ukraine.logisticscluster@wfp.org](mailto:Ukraine.logisticscluster@wfp.org) for further information.
