LOCATION
Dnipro, Ukraine (in-person and online)

DATE
5 October 2022

CHAIR
Logistics Cluster

PARTICIPANTS
Action Against Hunger, HI-Atlas Logistique, United Nations High Commissioner for Refugees (UNHCR), World Health Organization (WHO), World Food Programme (WFP), World Vision International.

ACTION POINTS
• Partners planning to deliver aid to the newly-accessible areas are encouraged to share their plans with the Logistics Cluster ukraine.logisticscluster@wfp.org.
• The Logistics Cluster to confirm if WFP is planning to open a new warehouse in Kharkiv.

AGENDA
1. Storage Update
2. Road Transport and Convoy Update
3. HI-Atlas Update
4. AOB

1. Storage Update

LOGISTICS CLUSTER
• The Logistics Cluster facilitates access to storage and transport services in Ukraine on a free-to-user basis, with a focus on hard-to-reach areas. The storage space is available for partners on the temporary basis for up to 60 days in Dnipro (4,500 m²), Kropyvnytskyi (1,000 m²), Kyiv (2,000 m²) and Odesa (2,500 m²)
• The largest stock is currently stored in the Dnipro common warehouse, however the warehouse is not yet at full capacity and stock is regularly being released and received.

PARTNERS-MANAGED STORAGE CAPACITY
• The Partners-managed Storage Capacity (PSC) interactive map is publicly available through the Logistics Information Exchange (LogIE) platform, which can be accessed through the Logistics Cluster Ukraine operation webpage.
• The interface displays – with the agreement of the humanitarian organisation itself – partners’ warehouses and those which are available for space sharing with other humanitarian organisations, to support the efficient use of resources (space-sharing
agreements between organisations should be arranged bilaterally). Going forward partners will also be asked if they consent to their warehouse information be shared (only) with other humanitarian organisations on a bilateral basis, to encourage and support interconnect and coordination among organisations.

- Warehouse icons never point to a physical facility of any kind, for security reasons.
- The Warehousing Survey continues to be opened to partners, who are invited to share their storage capacity details. The survey form is made up of eight questions and takes less than two minutes to be completed.
- Partners who need to update they warehouse information details, may contact ukraine.logisticscluster@wfp.org.
- So far, the partners-managed storage capacity across Ukraine is 53,129 m² across Dnipropetrovsk, Donetska, Kharkivska, Luhanska, Poltavska and Zaporizhka oblasts, of which 28,650 m² have been indicated as available storage capacity to be shared with other humanitarian organisations. Specifically across eastern oblasts, the highest storage capacity is reportedly in Dnipropetrovsk oblast with a total of 31,596 m², of which 19,900 m² available for sharing.

2. Road Transport and Convoy Update

- The Logistics Cluster supports humanitarian organisations with cargo consolidation and access to transport through inter-agency convoys, which are planned and coordinated by OCHA through the Humanitarian Operational Planning Cell (HOPC).
- Partners who need to access inter-agency convoys, should contact directly the OCHA focal points, Oleksii Shaidenkov oleksii.shaidenkov@un.org and Olena Baranova olena.baranova@un.org.

3. HI-Atlas Logistique

- HI-Atlas Logistique offers free-to-user transport and storage services to the humanitarian community in Ukraine. To date, HI-Atlas Logistique has supported partners with 401 shipments, 35 per cent of which were dispatched to hard-to-reach areas.
- HI-Atlas Logistique is providing access to common logistics services on a free-to-user basis. Warehousing facilities are in the following locations:
  - Dnipro 3,000 m² (of which 300 m² for cold chain storage)

https://logcluster.org/ops/ukr22a
- Kharkiv 1,500 m² with cross-docking and kitting services, and 67 m³ of refrigerated container space (2°C to 8°C/15°C to 25°C)
- Vinnytsia 1,300 m² with storage and kitting services, and 150 m² of temperature-controlled storage (15°C to 25°C), and 67 m³ of refrigerated container space (2°C to 8°C/15°C to 25°C)

- A security assessment is being conducted in Kharkivska oblast as it is a newly accessible area.
- Starting from October, HI-Atlas Logistique has launched a cold chain (2°C to 8°C) road transport pilot service, which is managed by a pharmacist. For any cold chain related questions, partners can contact directly j.papin@hi.org.
- Partners who need to access HI-Atlas Logistique services, can contact the organisation directly at mo.houche@hi.org for road transport, and a.chivot@hi.org for storage.

4. AOB

- Partners are encouraged to share their response plans to newly-accessible areas with the Logistics Cluster at ukraine.logisticscluster@wfp.org. The Cluster is seeking further information from partners on delivery locations, item categories, and prioritisation, to support the planning of its logistical support to humanitarian organisations.
- Partners inquired about WFP plans to setup a warehouse in Kharkiv. Post factum: WFP is not currently planning to setup warehouse capacity in Kharkiv, as deliveries are being conducted directly through its cooperating partners.
- For partners information, the Inter-Cluster Coordination Group (ICCG) is leading the compilation of a Preparedness Plan for Newly Accessible Areas, which is to be finalised and presented to the Humanitarian Country Team (13 October). Partners should coordinate with the respective sectoral clusters for inputs.
- As a part of Humanitarian Programme Cycle 2023, the Logistics Cluster will attend the 7 October HPC workshop, led by OCHA.
- The Directorate-General for European Civil Protection and Humanitarian Aid Operations (DG ECHO) is looking at establishing a railroad transport solution, in the framework of its humanitarian and civil protection response in Ukraine. This connection (the EU train) would allow large quantities of humanitarian relief material to be transported from Poland into Ukraine.
The first EU train (from Poland to Kharkiv) is now fully booked and the Commission is collecting potential interest for additional train voyages. Partners interested in the EU train, can write directly to both ECHO-EUROPEAN-HUMANITARIAN-RESPONSE-CAPACITY@ec.europa.eu and Alexandre Veron alexandre.veron@rlh.coop, from the Humanitarian Logistics Network (RLH).

The next Dnipro coordination meeting will take place on 19 October 2022 at 16:00.
