LOCATION
Dnipro, Ukraine (in-person and online)

DATE
19 October 2022

CHAIR
Logistics Cluster

PARTICIPANTS
Action Against Hunger, Atlas Logistique-Humanity and Inclusion (HI), International Medical Corps (IMC), Station Kharkiv, United Nations High Commissioner for Refugees (UNHCR), World Health Organization (WHO), World Food Programme (WFP), World Vision International (WVI).

ACTION POINTS
• Partners planning to require additional common services are encouraged to share their plans with the Logistics Cluster ukraine.logisticscluster@wfp.org.

AGENDA
1. Storage Update
2. Road Transport and Convoy Update
3. Atlas Logistique-HI Update
4. Gaps and Needs Analysis Refreshing
5. AOB

1. Storage Update

LOGISTICS CLUSTER
• The Logistics Cluster facilitates access to storage and transport services in Ukraine on a free-to-user basis, with a focus on hard-to-reach areas. Common storage space is available to partners in Dnipro (4,500 m²), Kropyvnytskyi (1,000 m²), Kyiv (2,000 m²) and Odesa (2,500 m²).
• As per the Transport and Temporary Storage Standard Operating Procedures (SOPs), relief items are to be stored temporarily in Logistics Cluster common warehouses for up to 60 days, to ensure fair access to free-to-user warehousing space for all organisations and to avoid humanitarian cargo becoming static.

PARTNERS-MANAGED STORAGE CAPACITY
• The Partners-managed Storage Capacity (PSC) interactive map is publicly available through the Logistics Information Exchange (LogIE) platform, which can be accessed through the Logistics Cluster Ukraine operation webpage.
• The interface displays – with the agreement of the humanitarian organisation itself – partners’ warehouses and those which are available for space sharing with other humanitarian
organisations, to support the efficient use of resources (space-sharing agreements between organisations should be arranged bilaterally). Going forward partners will also be asked if they consent to their warehouse information be shared (only) with other humanitarian organisations on a bilateral basis, to encourage and support interconnectivity and coordination among organisations.

- Warehouse icons do not point to a physical facility of any kind, for security reasons.
- The Warehousing Survey continues to be open to partners, who are invited to share their storage capacity details. The survey form is made up of eight questions and takes less than two minutes to be completed.
- Partners who need to update they warehouse information details, may contact ukraine.logisticscluster@wfp.org.
- So far, the partners-managed storage capacity across Ukraine is 52,069 m² across Dnipropetrovska, Donetsk, Kharkivska, Luhanska, Poltavsk and Zaporizhka oblasts, of which 28,650 m² have been indicated as available storage capacity to be shared with other humanitarian organisations. Specifically across eastern oblasts, the highest storage capacity is reportedly in Dnipropetrovska oblast with a total of 31,596 m², of which 19,900 m² available for sharing.

2. Road Transport and Convoy Update

- The Logistics Cluster facilitates access to transport services for partners via a dedicated fleet and/or commercial transport to the hard-to-reach areas in eastern and southern Ukraine.
- Partners are encouraged to contact ukraine.clustercargo@wfp.org to check if the destinations they need to dispatch cargo to, are available through transport service providers or if the transport can be supported by the Logistics Cluster.
- If partners require information on the accessibility of road and/or areas in order to deliver relief items, please reach out to ukraine.logisticscluster@wfp.org.
- In addition, the Logistics Cluster supports humanitarian organisations with cargo consolidation and access to transport through the inter-agency convoys, which are planned and coordinated by OCHA through the Humanitarian Operational Planning Cell (HOPC).
- Partners who need to access inter-agency convoys, should directly contact the following OCHA focal points:
  - Donetsk oblast: Lena Gorska lgorska@un.org and Shahlo Rahimova rahimova@un.org
  - Kharkivska oblast: Maka Khazalia maka.khazalia@un.org
3. Atlas Logistique – Humanity and Inclusion Update

- Atlas Logistique-HI offers free-to-user transport and storage services to the humanitarian community in Ukraine.
- Warehousing facilities are in the following locations:
  - Dnipro 3,000 m² (of which 300 m² for cold chain storage)
  - Kharkiv 1,500 m² with cross-docking and kitting services, and 67 m² of refrigerated container space (2°C to 8°C/15°C to 25°C)
  - Vinnytsia 1,300 m² with storage and kitting services, and 150 m² of temperature-controlled storage (15°C to 25°C), and 67 m² of refrigerated container space (2°C to 8°C/15°C to 25°C)
- Starting from 24 October, a new warehouse in Dnipro will be opened, with 3,500 m² equipped with temperature control (between -2°C and +18°C) in each of the five rooms, with additional air conditioning regulation and two 67 m² refrigerated containers.
- Partners who need to access HI-Atlas Logistique services, can contact the organisation directly at mo.houche@hi.org for road transport, and a.chivot@hi.org for storage.

4. Gaps and Needs Analysis Refresher

- In September, the Logistics Cluster conducted a refresher of the June 2022 Gaps and Needs Analysis (GNA), to ensure that the Logistics Cluster Concept of Operations (ConOps) is still relevant, and to inform the drafting of the Humanitarian Response Plan 2023 Logistics section accordingly.
- 17 semi-structured interviews were conducted across UN agencies, NGOs and the International Red Cross and Red Crescent Movement, with 80 percent of participants’ roles being at Director or Country Manager level.
- In regards to winterisation activities, 30 percent of organisations confirm to have completed their plans, and 55 percent confirm to have sufficient supply chain resources.
The most notable preliminary finding relates to organisations’ expected use of common logistics services, which is foreseen to increase from a current 40 percent to a future 60 percent – which represents a 50 percent increase.

The Logistics Cluster strongly encourages partners to share their logistical plans in relation to the ongoing winterisation preparedness efforts with ukraine.logisticscluster@wfp.org. This will allow for Cluster visibility and therefore ensure the ability to support partners with their common logistical needs.

The September GNA refresher summary is in the process of being finalised, and will be published on the dedicated webpage and shared with partners.

5. AOB

- WFP is not currently planning to setup warehouse capacity in Kharkiv, as deliveries are being conducted directly through its cooperating partners.

- The Logistics Cluster, continues to work closely with WFP Supply Chain in monitoring fuel availability levels in country. To this effect, a second Fuel Survey was circulated and closed on 13 October COB. The results of the survey are being processed and will be shared with partners during a coordination meeting.

- The aim of the survey was threefold i) to determine if the humanitarian community is currently facing any constraint specific to fuel procurement, ii) to understand if there have been any significant changes since the last fuel survey conducted in May, and iii) to support operational planning by collecting information on the monthly fuel consumption of humanitarian organisations.

- OCHA released a Winterisation Dashboard, which maps the different winterisation activities by cluster across oblasts.

- Partners flagged that they are experiencing bottlenecks with stock release for the last-mile distribution.

- For further information about Logistics Cluster activities, please visit the dedicated Logistics Cluster Ukraine operation webpage or contact ukraine.logisticscluster@wfp.org.

The next Dnipro coordination meeting will take place on 2 November 2022 at 16:00.
