Background

The Logistics Cluster facilitates the coordination of the logistics response in support of the humanitarian community in South Sudan. It also provides information management services to improve the decision-making of humanitarian organisations in South Sudan. Where logistic gaps are identified, the WFP-led Logistics Cluster acts as a Provider of Last Resort by facilitating access to these common logistics services to support the humanitarian community in their operations.

Operational Highlights

- During July - September, the Logistics Cluster facilitated the transportation of 884 mt of humanitarian cargo of which 42 percent was transported by road or river. The cluster supported a total of 54 organisations and reached 41 destinations.

- The Logistics Cluster supported the Sudan emergency response in Malakal, Renk, and Rubkona by facilitating air transportation of 439 mt of camp coordination and camp management, general operation/program, health, logistics, nutrition, protection, shelter, telecommunication, and WASH supplies on behalf of 29 humanitarian organizations. Additionally, the cluster transported 91 mt of relief cargo by river to Malakal and Renk and 67 mt to Rotriak and Wedweil by road using IOM’s Common Transport Service (CTS) trucks.

- Eleven road convoys were coordinated during this period with an estimated 2,183 mt of non-food items transported to locations in Central Equatoria, Eastern Equatoria, Western Equatoria, and along the Western Corridor.

Coordination and Information Management

- Six coordination meetings were conducted in Bentiu, Bor, Juba, and Wau with a general focus on cross-border initiative, road convoy coordination in line with the upcoming dry season prepositioning, and special focus meetings coordinated to highlight the cluster’s services in support of the Sudan crisis.

- The Logistics Cluster published 33 information management products on its webpage.

Logistics Capacity Building

- Temperature Sensitive Logistics and Basic Humanitarian Logistics training were conducted for 80 humanitarian logisticians represented from 43 partner organizations. The training was aimed at providing participants with a common understanding of warehouse and Inventory management, the requirements for handling medical items, and the basic principles of Good Distribution Practice (GDP).
