

LOGISTICS CLUSTER

1 YEAR

since the activation of the
PALESTINE LOGISTICS CLUSTER

GAZA

The Logistics Cluster has implemented a flexible and innovative approach to mitigate severe access constraints by:

- Enabling logistics coordination and advocate for increased uninterrupted flow of assistance
- Supporting cargo reception and uplift at different entry points
- Facilitating access to common storage to optimise scarce resources
- Facilitating common transport services, as access and security allowed

7

Warehouses have been used to accomodate partners cargo in a continuous changing scenario

11,618

mt of cargo have been collected and transported from the entry points

JORDAN

Access from Jordan has been crucial for delivering essential humanitarian supplies to Gaza through various corridors

975

trucks in support of

23

organizations

The trucks travelled over 170,000 km, which represents 4,000 times the length of the Gaza Strip

260

partners supported

147

documents published

88

coordination meetings

24

in person in Gaza

EGYPT

Enhancing the response through national capacities by:
