

Q2 2025 EMERGENCY PREPAREDNESS

36 STAKEHOLDERS ENGAGED

LEGEND

- COORDINATION
- INFORMATION MANAGEMENT

HIGHLIGHTS

Weekly coordination meetings enabled follow-up on key action points, including partner commitments for critical supplies and coordination with government counterparts on anticipated support and delivery timelines, ensuring alignment with the government-led Mpx and Cholera response through the National Logistics Working Group (NLWG).

The inclusion of additional local organizations, academia, and private sector in the NLWG, provides not only expertise, but strengthens collaboration in emergency preparedness.

Enhanced synergy of partners and integration of logistics through participation in vulnerability mapping training, coordinated by the Disaster Management Department (DMD) and the World Food Programme (WFP).
