amiad filtration systems (1997) Ltd.

RE: Letter of Introduction/Offer: Amiad Water Treatment/Filtration Systems.

Dear Sir/Madam,

We, at **Amiran Kenya Ltd.**, represent **Amiad Filtration Systems** in East Africa.

In an increasingly crowded world, the need for clean water concerns everyone involved in sustaining our quality of life into the twenty-first century. For more than 3 decades, **Amiad Filtration Systems** has been the leading water filtration company across five continents, in providing clean, reusable process, plant and supply water. Using the knowledge and expertise built over the last 30 years, **Amiad** has developed a comprehensive line of exceptionally efficient self-cleaning automatic, semi-automatic and manual filters.

Amiad Filtration Systems has provided economical and ecological 'Clear Solutions' for virtually every water filtration requirement, whether domestic, residential, commercial, agricultural or industrial in nature. The list includes treatment of supply water, cooling water, process/plant water, to mineral and chemical recycling systems and the treatment of effluent/waste water to specified standards from practically any raw water or used water source (rain, river, dam, well, borehole, lake, mains supply, or other).

Amiad Filtration Systems have been applied internationally in the following fields; the construction, building materials and real-estate industry; hotel & hospitality industry; hospitals, laboratory, clinical & pharmaceutical industries; the paint, printing, chemical and petrochemical industries; electronics, power plants, mining, rubber moldings and plastic industries; steel industry; the food & beverage industry, paper, packaging and textile industries along with irrigation & agricultural systems, amongst many other applications.

Amiad provides a wide range of filtration solutions for water treatment such as complete skid-mounted drinking water purification treatment units or specifically designed water treatment solutions that integrate into various existing plant and equipment to achieve specified particle, mineral, chemical and biological removal parameters. Our water treatment options include technologies such as Deep Multi-media Gravel/Sand filtration systems, UV & Ozone Sterilisation systems, Reverse Osmosis, Ultra~, Nano~ & Micro Filtration, Sedimentation, Flocculation/Coagulation and Chemical dosing pumps, hydraulic disk, perforated and fine micron mesh screen filters, fiber and activated carbon fine micron cartridge filters, amongst other water membrane, ion exchange, sterilization, purification and separation technologies.

With our fully integrated product lines we can supply you water of the highest quality by drawing from our resources internationally to optimize and custom-engineer a '**Clear Solution**' to meet with your own particular needs.

Remember, our '**Clear Solutions**' give you a quality assured '**Competitive Advantage**'.
