

Creating great homes together

Role Profile

Position

Senior (Azure) Cloud Engineer

Reporting to

Network Manager

What you can expect

We're a magnificent place to work, where talented and ambitious people enjoy rewarding, purposeful and fulfilling careers in an inspirational environment.

- Support in your continuous professional development.
- Bring Magna's Digital & Technology Strategy to life.
- Join the IT Leadership Team.
- Passion, commitment and drive to do the right thing to create a great customer experience.
- Fast paced, adaptable and collaborative environment.
- Agile working based at home, travelling to Magna sites as required.
- At Magna, we are committed to your growth and professional journey. We offer ample opportunities for further training and development, empowering you to excel in your career. Our comprehensive benefits package underpins our commitment to your well-being and includes a generous Pension Scheme, Health Care Cash Plan, Wellbeing Portal and Employee Assistance Program. These resources are designed to support both your mental and physical health, ensuring your success in both personal and professional aspects of life.
- We actively support our local communities and encourage employee involvement by offering one paid day per year for volunteer activities alongside access to Credit Union facilities and Colleague Voice. You will also benefit from Company Sick Pay and a competitive annual leave entitlement, which increases progressively with your length of service over the first five years.

What you are known for

- Support our Azure infrastructure to resolve critical and complex technical issues leveraging your technical and product expertise along with your understanding of the business' needs.
- As subject matter expert, promote the understanding and training of Azure within the IT Team.
- Act as a technical escalation point within the team. Participate in triage meetings to share knowledge with other engineers and develop efficient solutions. Consistently share best practices with team members and help create a knowledge base article to solve/workaround issues.
- Providing technical support to assist the Operations team.

What you take care of

- Design and planning of Azure cloud solutions to facilitate the migration from our on-premises environment.
- Implement scalable and available solutions based on industry architectural best practices, and practical experience. Translating features in the Azure / M365 roadmap into workable business solutions.
- Take ownership and responsibility of their Azure Cloud footprint and Microsoft cloud platforms (M365), ensuring the design and integrity of Cloud architecture and services are fit for purpose.
- You will build and develop governance around Azure cloud solutions.
- You will be involved in projects and the deployment of new applications and software, as well as, the monitoring, troubleshooting and ongoing development of the Azure Cloud environment.

What you need to be successful

- Certification in Microsoft Azure and/or competing Cloud Technologies.
- Direct experience architecting and deploying cloud technology within Azure or AWS.
- Experience in a similar position with Azure management skills - managing Azure & Office 365 licensing, following license management best practices.
- Proficient in configuration, design & support of Microsoft Servers, VMWare and virtual infrastructures.
- Deep Understanding of cloud computing technologies across Windows, with demonstrated hands-on experience of Azure services.
- Experience in one or more automation languages (PowerShell, Python, C#, Open Source).
- Expert with M365 technology.
- Ability to learn new technology in a fast-paced environment. Ability to deal with ambiguity.
- Demonstrate critical thinking, strong communication skills and the ability to develop strategic relationships.
