That's still almost 40% unsatisfied, of which I am one. The damp and mould in my home is now out of hand. I've reported it to multiple people, I've had an inspection and still you've barely done anything to resolve it. I'm now 35 weeks pregnant and sleeping on the floor. This is unsafe for me and my unborn child. How is this ok? I'm taking this to the press as I don't know how else to get you to take this seriously and prioritise my situation.
