

Q-SYS NC Series

Network ePTZ cameras

Q-SYS NC-90-G2

Q-SYS NC-110

KEY FEATURES

- NC-90-G2: 20 MP fixed-lens electronic pan, tilt, zoom (ePTZ) with 90° horizontal field of view
- NC-110: 8 MP fixed-lens electronic pan, tilt, zoom (ePTZ) with 110° horizontal field of view
- Active Speaker Framing (NC-90-G2 only) enables AI-driven dynamic camera positioning with full-body recognition to ensure that talkers stay in frame even if turned from the camera.
- Tile View (NC-90-G2 only) offers a multiview composition of up to nine framed shots for a better collaboration experience from a single network camera. Note: Tile View not yet compatible when using Q-SYS I/O-USB Bridge or NV-21-HU as a video bridge; expected in early 2026 Q-SYS Designer release.
- Professional quality video conferencing for the Q-SYS AV bridging solution
- Power over Ethernet (PoE+)
- Distribute video via the Q-LAN network anywhere it is needed
- Add as many network-based NC Series cameras to a design as needed to enable multi-camera functionality when integrating UC platforms
- Complete camera imaging controls, including white balance, focus and exposure
- Image Rotation control inverts the video when the camera is mounted upside down. For PTZ cameras, the optional ceiling mount accessory is the PTZ-CMB1
- Includes lens cover for privacy (NC-90 & NC-110 only)

Q-SYS NC Series network cameras deliver high-quality video feeds natively to Q-SYS. The NC-110 is an ePTZ network camera with 110 horizontal field-of-view for smaller-wider room types. The NC-90-G2 is the next generation ePTZ network camera that combines onboard AI with enhanced optics to deliver an automated collaboration experience in smaller, wider collaboration spaces.

Driven by the Q-SYS OS, the NC Series integrate seamlessly into any Q-SYS system, allowing for easy camera feed routing anywhere on the network without the need for complicated programming or video matrix hardware. These camera video feeds are delivered to any modern video conferencing applications such as Microsoft Teams, Zoom, Google Meet, and Cisco Webex via any Q-SYS AV bridging peripheral

CAPTURE ANY SPACE

Q-SYS NC Series enables a broad range of room layouts, sizes and purpose to ensure all in-room participants can be seen. The NC-90 and NC-110 ePTZ cameras enable smaller, wider room types, while the NC-12x80 and NC-20x60 deliver PTZ functionality for larger and/or reconfigurable room layouts.

NETWORK SIMPLICITY, USB DELIVERY

NC Series enlists a single network cable for video, power and control data transport into Q-SYS and then delivers the video to its intended UC compute device via USB. By leveraging the power of the network, Q-SYS allows you to add as to add as many NC Series cameras to your system as you desire, all while delivering a singular UVC/UAC stream to your application of choice.

INTRINSIC CONTROL & AUTOMATION

As native Q-SYS devices, NC Series leverage the full capabilities of the Q-SYS control engine, from drag-and-drop integration to scalable user control and automation. This allows you to design and deliver a user control and automation experience tailor-made for each unique space.

INTEGRATED AUDIO, VIDEO AND CONTROL

NC Series cameras are driven by the Q-SYS Full Stack AV Platform, which unifies data, devices and a cloud-first open architecture to deliver a fully integrated audio, video and control solution that offers simpler integration and software-based scalability.
