

ENVIRONMENTAL POLICY STATEMENT

ECHA Microbiology Ltd specialises in solving problems of microbial fouling, spoilage and corrosion in industry and provides a comprehensive range of services and products. These include consultancy, advisory and investigative services, analytical and research services, training, test kits and treatment solutions.

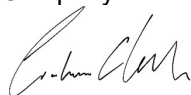

We recognise that our activities have an impact on the environment and are committed to protecting the environment, preventing pollution, complying with applicable environmental legislation and continually improving our environmental performance.

To support this commitment, ECHA Microbiology Ltd:

- Complies with applicable environmental legislation, regulations and other relevant obligations.
- Is implementing an Environmental Management System aligned with the requirements of ISO 14001.
- Works to prevent pollution and minimise the environmental impact of its laboratory, production and business activities.
- Considers environmental and climate-related impacts when planning business activities, projects and improvement initiatives.
- Seeks to reduce its environmental impact through the efficient use of energy, water, materials and other resources.
- Aims to reduce carbon emissions by minimising unnecessary travel, making effective use of remote communication technologies where practical, and encouraging car sharing where appropriate.
- Purchases and uses energy-efficient equipment and vehicles where feasible and encourages equipment and lighting to be switched off or placed in standby mode when not in use.
- Uses environmentally responsible energy suppliers where available and practicable.
- Applies the principles of reduce, reuse and recycle wherever practical, including the recycling of office and laboratory waste.
- Uses recyclable packaging and recycled materials where suitable and practicable.
- Assesses and manages the environmental impact of chemicals used within its laboratory and production activities and seeks lower-impact alternatives where feasible.
- Manages hazardous and special waste responsibly and in accordance with legal and regulatory requirements.
- Considers environmental and sustainability factors when selecting suppliers, products and services where practical.
- Promotes environmental awareness and responsible environmental practices amongst employees.
- We monitor our environmental performance, including energy consumption, waste disposal and recycling activities, and use the information gathered to support the management of our environmental impacts and identify opportunities for continual improvement.

This policy is reviewed at least annually, and sooner where significant changes occur that may affect its suitability, effectiveness or relevance

This policy is communicated to all employees, displayed at our premises and made available on the Company website.
