

# Holiday Inn Gloucester – Cheltenham (IHG)

## Environmental, Social & Governance (ESG) Overview

*Delivering Responsible Hospitality*

### ■ Environmental Stewardship at a Local Level

At **Holiday Inn Gloucester – Cheltenham**, we proudly support **IHG's global Journey to Tomorrow** strategy by embedding sustainability into every part of our operations.

### ■ Combined Heat & Power (CHP) Units

We operate **two gas-powered CHP units** that generate both **electricity** and **supplementary heating** for the entire hotel. This technology improves energy efficiency while significantly reducing our carbon footprint.

### ■ Datavision Real-Time Utility Monitoring

We use **Datavision**, an intelligent utility monitoring system that updates every **15 minutes** and provides **daily reports**. This enables precise tracking of our electricity, gas, and water usage, helping us make informed decisions and reduce waste.

### ■ EP&T; Energy Efficiency Partnership

Through our partnership with **EP&T**, we receive **monthly performance reports** and tailored **action plans**. These support us in identifying opportunities to cut energy consumption and increase operational efficiency.

### ■ 100% LED Lighting Throughout

The hotel is now **fully LED-lit**, helping to lower energy consumption, reduce maintenance, and minimise environmental impact.

### ■ Aligned with IHG's Journey to Tomorrow

As part of **IHG Hotels & Resorts**, we are aligned with the group's long-term ESG vision, **Journey to Tomorrow**, which includes:

- Achieving **net zero carbon emissions by 2050**
- Reducing **energy and water use per occupied room**
- Eliminating **single-use items** and minimising waste
- Championing inclusion, wellbeing, and local community support
