

Hybrid Event Studio

Features

Our technical broadcast quality Studio X solution is designed around an LED wall backdrop and stage, giving you a setting to reach your audience without losing the impact of branding, key messages and custom moving content. An extensive conference lighting rig forms part of the installation - this together with a complete microphone and audio package ensures that the emphasis remains on capturing a live experience for the remote viewers. Dedicated technicians are on-hand to handle all aspects of content, vision mixing, lighting and sound.
