MODERN INTERPRETATION OF INDUSTRIAL LUXE AND ARCHITECTURAL CHIC

The raw materials and exposed inner workings of Elettra features a modern interpretation of industrial luxe and architectural chic. The culmination of polished, stained concrete floors and black open plenum ceiling make a welcome comeback to the narrative of the event space. Textured light charcoal walls with speckled gold and black pattern grid windows create a tactile and nuance feel inside the chic, pillarless room. Elettra features a grand white fluted marble bar and the floor to ceiling mirrored panelling maximising the height of the area for a dramatic and luxurious experience. Pendants of Edison light bulbs scattered throughout illuminate and complete the versatile space.
