

Cliftons Computer Training Rooms

Fully equipped spaces to keep your team at the leading edge

Setting up and maintaining a dedicated computer training room is a luxury that most businesses can't justify. The expense of equipment – not to mention taking up a whole room at a time when many organisations are reducing their office footprint – and ongoing IT support can quickly add up.

Cliftons computer training rooms provide a convenient and affordable alternative. With central CBD locations across multiple cities, we provide organisations with the latest IT equipment adaptable to your training needs.

You get:

- A standardised IT environment
- Optimised hardware requirements to ensure your software is at the best configuration
- High-speed internet with two networks for full redundancy
- Onsite technical support
- Secure remote network connection
- Options for remote training, including from homes, offices or across multiple Cliftons sites
- All AV requirements, including options for data projectors and centre monitor viewing systems
- A comprehensive learning experience, including full catering if required.

Tech that works for you

Cliftons computer training rooms are ideal for a range of businesses. Whether you need to run in-house training for your team or you need to run regular sessions for customers on how to get the most out of your software product, we can provide an optimised environment for you.

Talk to us about computer training rooms for:

- Development labs
- Software training and rollouts
- Systems testing
- Examinations
- Project management
- Technical lab training
- OEM and channel partner training
- Workshops
- IT training
- Remote and online training
- Hackathons and innovation workshops.

Built-in support

Forget having to maintain equipment. Get the right IT environment for your training requirements every time.

Our computer training rooms can be configured for your needs, backed up by a dedicated team.

Our service includes:

Onsite Tech

Technical support staff are on hand around the clock, meaning you can relax knowing help is there if you need it. Techs are backed up by a head office support team who can escalate issues for fast resolution.

Network Security

All Cliftons venues are supported by high-level logical and physical network security measures to help keep your data secure. Core infrastructure logically separates individual rooms for security but allows for multi-room connections if required. That's both within a venue and across our venues located in different cities.

Secure Connections to your network

Connect to your own network using your preferred connection option. Cliftons IT team is flexible and can work with you to support your desired setup.

Super-fast internet

Our venues feature two separate networks to ensure fast internet service continues in the event of a network failure. An instructor ethernet cable and solid Wi-Fi connection is provided in rooms, along with free guest Wi-Fi in breakout areas.

Dedicated event support

Cliftons employ a dedicated team of schedule and event management staff (along with technical staff) to ensure your event runs seamlessly every time. A dedicated events coordinator is appointed to take care of all your requirements, including on-the-day support. We're here to make sure your event runs smoothly and can cater to most special requests.

Our clients include leading corporates, SaaS and IT vendors, who trust us to manage the end-to-end delivery of their training requirements. We'd love to help you, too.
