

Cotswold Inns & Hotels is committed to working in a sustainable way and take care to reduce, re-use and recycle. We are continually working to improve our standards, which include:

Using low energy lighting

Switching off all equipment when not in use, where possible

Only lighting log fires during cooler weather

Using local suppliers for food, drink and other consumables where we can

Composting garden waste, recycling paper and card and sending cooking oil to be converted to biodiesel

Asking guests to conserve water and switch off TVs when not in use

Replacing towels when requested

Supporting the local community by offering sponsorship and raffle prizes, as well as discounted rates for local businesses needing accommodation.

We welcome our guests' ideas: if you have any suggestions for further improvements, please let us know.
