

Clermont Hotel Group has received the Platinum Winner Award in the Greengage sustainability awards 2024.

In 2023, the different hotel brands under Clermont Hotel Group were continuously evolving to have an Environmental, Social and Governance (ESG) strategy in place, outlining all areas that are prioritized within the business acting with consciousness and care for the environment. The different properties under Clermont Hotel Group, each with a unique personality, did a lot of effort to decrease overall environmental impacts, especially through water and electricity consumption, as well as reducing the ecological footprint.

Clermont Hotel Group has also formed a “Greener Futures” team, which is in place across all our individual hotels whereby teams meet on a

quarterly basis to discuss ways in which the company can continue to push the boundaries when it comes to reducing its carbon emissions. With the ongoing commitment to reduce single use plastics across the collection of hotels, Clermont Hotel Group has also invested in other sustainable initiatives like bulk toiletries, bamboo key cards and cardboard pens instead of the plastic ones, a towel reuse programme to reduce water consumption, as well as other sustainability projects that are currently being explored.

Promoting sustainability with guest rewards for opting out of housekeeping.

Plastic-free wooden key cards.

Eco-friendly ballpoint pen made from sustainable bamboo.
