

## Lumière London

### Sustainability Policy

---

**We are a premier event venue provider, offering 10 versatile event spaces in prime London locations, including Southbank, Hyde Park Corner, and Shoreditch. Ranging from 700 to 5,900 sq ft, our venues accommodate events of all sizes and budgets and cater for corporate functions, private celebrations, and cultural gatherings.**

### Our Sustainability Values Statement

- **People: Creating Community - We care** about our guests, our suppliers, our team and our community. We embrace and respect people's differences and aim to give back to our community.
- **Places: Creating Beauty - We understand** the need to protect our natural environment. We provide beautiful venues that limit the day-to-day impact of our business practices on our planet. Our venues are a safe space for everyone to feel at home.
- **Planet: Creating a Sustainable Future - We aim to follow and champion** good sustainability practices, reduce the environmental impacts of our activities, and keep learning and sharing best practices with our industry.

### Our Sustainability Policy

We will uphold sustainability practices by:

- Ensuring we comply with all relevant environmental regulations and legislation.
- Reducing our consumption of resources including energy, water, and other raw materials, and ensuring the efficient use of the resources we do consume.
- Ensuring consideration is given to the environmental, social, and ethical impacts of the goods and services we buy.

- Working with our suppliers to reduce the impact of our supply chain and to encourage them to improve their sustainable and environmental practices.
- Managing waste generated from our business in line with the waste hierarchy; by avoiding waste in the first place, then giving priority to minimising, reusing, recycling, recovery of waste, and finally ensuring the safe disposal of waste.
- Regularly reviewing our practices with the aim of continually improving the impact of our business activities on the environment, local community, and wider society.
- Measuring and taking action to reduce the greenhouse gas emissions associated with our business activities.
- Supporting social and environmental projects and initiatives within our community or in wider society.

Some of the measures we take include:

- Using energy-efficient lighting and equipment
- Implementing recycling and waste reduction programs
- Using sustainable and environmentally friendly materials
- Offering options for reducing transportation emissions

This policy will be reviewed regularly to evaluate its continued relevance and to monitor our progress.
