

## Eye Treatments

### EYELASH PERMING:

This is a semi-permanent method of curling your eyelashes. Curled eyelashes will enhance the appearance of the eyes and will normally last between 4-5 weeks. This is a method of enhancing your eyelashes and your face giving an open eyed look.

*What happens during the treatment:* Using a small roller and water soluble glue, the lashes are rolled and separated to help ensure a beautiful natural appearance. Perming lotion is then applied to the lashes and left for 15 minutes followed by the application of a neutraliser. This is then left for a further 15 minutes under cover. Finally, damp cotton wool is used to gently remove the roller, leaving you with enhanced curled eyelashes.

For improved effect, tint may be applied directly afterwards.

*Important:* You will need to visit the clinic for a patch test prior to the treatment to ensure no allergy exists. If you have had any known eye disorders in the past, please discuss this with the practitioner at the time of booking.

### EYELASH TINTING AND EYEBROW TINTING:

Eyelash tinting will enhance the general appearance of your eyes and is particularly beneficial for people who participate in sporting activities, especially swimming. Unlike mascara the effect is very natural - so no more panda eyes!

*What happens during the treatment:* This is a straight forward, quick and painless procedure using vegetable dye to tint your lashes. A range of colours for you to choose from to enhance your lashes. Your therapist will advise on which colour to use for best results. Please note that we are unable to make your eye lashes lighter than the natural colour.

*Important:* A patch test is required prior to tinting to ensure no sensitivity to the product exists.

### **Benefits of eyelash tinting,**

- **Enhance general appearance of eyes**
- **Great for people with known sensitivity to make-up**
- **Good for sporting activities, especially swimming**
