## Description

This Risk Assessment sets out the controls that will be in place for the Bodmin Road office workplace and activities in order to reduce the risk of the transmission of the COVID-19 virus and demonstrate that Elmdene, Millboard & Murrays are COVID-secure.

Due to the emerging evidence and changes to Government Guidance this risk assessment will be regularly reviewed: it is vital that the most up to date guidance is referred to; this can be found at <https://www.gov.uk/guidance/working-safely-during-coronavirus-covid-19>.

It should be noted that wherever possible people should still be encouraged to work from home.

**Further control measures**

None required

**Operating procedures**

In the context of COVID-19 this means working through these steps in order:

In every workplace, increasing the frequency of handwashing and surface cleaning.

Businesses and workplaces should make every reasonable effort to enable working from home as a first option.

Where working from home is not possible, workplaces should make every reasonable effort to comply with the social distancing guidelines set out by the government (keeping people 2m apart wherever possible).

Where the social distancing guidelines cannot be followed in full, in relation to a particular activity, businesses should consider whether that activity needs to continue for the business to operate and if so, take all the mitigating actions possible to reduce the risk of transmission between their staff.

Further mitigating actions include:

- Increasing the frequency of hand washing and surface cleaning.
- Keeping the activity time involved as short as possible.
- Using screens or barriers to separate people from each other.
- Using back-to-back or side-to-side working (rather than face-to-face) whenever possible.
- Reducing the number of people each person has contact with by using 'fixed teams or partnering' (so each person works with only a few others).
- Improving ventilation
- Finally, if people must work face-to-face for a sustained period with more than a small group of fixed partners, then you will need to assess whether the activity can safely go ahead.
- No one is obliged to work in an unsafe work environment.

### Risk rating explanation

Risk ratings are calculated by considering the likelihood of an event occurring along with the severity of the potential consequence should an accident occur. After considering existing control measures, values are assigned to the likelihood and severity from the scales below and these figures multiplied to established the risk rating.

### What do your risk ratings mean?

■

 Risk is categorised as LOW: Look to reduce risk if practicable

■

 Risk has been categorised as MEDIUM: Begin to plan your action to reduce the risk immediately

■

 Risk has been categorised as HIGH: Immediate action required to reduce the risk
