ACCELERATE 

Tailored Enterprise- Wide AI Learning Solutions

Helping global organisations build practical AI capability across leadership, technology and business teams.

What is NeuedAI Accelerate?

NeuedAI Accelerate is Neueda's enterprise-wide AI learning offering, designed to build practical AI capability across leadership, technology, and business teams. More than a training provider, we work with global clients as an AI transformation partner to create tailored learning journeys that support real-world AI adoption and lasting change in how teams work.

Foundational AI literacy for all staff

Governed, scalable AI deployment

Role-specific learning pathways

Tailored for enterprise adoption

Who's it for?

We create personalised programmes for every level of your organisation.

Technology Leaders

Define the AI operating model, enable scalable platforms, and ensure secure, high-quality deployment.

Engineering Teams

Build and integrate AI-enabled solutions while leveraging AI assisted development to accelerate delivery.

Business and Operations Teams

Identify practical use cases and redesign workflows to unlock measurable productivity gains through AI.

Internal AI Champions

Drive peer adoption, reinforce best practice, and sustain enterprisewide AI momentum beyond formal training.

Our blended learning approach

We design tailored AI learning journeys that combine expert-led learning, digital content and practical application to build lasting AI capability across the enterprise.

Phase 1

Discover and Design

We begin by understanding your organisation's priorities, learners, technology landscape and challenges, so we can shape a tailored AI learning journey aligned to your goals.

Phase 2

Blended Delivery

Through practical exercises and team-based scenarios, we design learning around real business challenges so that learners can apply AI in ways that are directly relevant to their roles.

Live expert-led learning

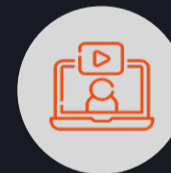

Microlearning modules

Masterclasses and webinars

Video tutorials

Interactive workshops

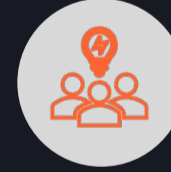

Labs and sandboxes

Office hours and Q&A

Applied challenges

Outcome

Applied Intelligence

The result is practical, role-relevant AI capability that supports confident adoption, improved productivity and meaningful impact across the organisation.

NeuedAI Accelerate

Meet your instructors

Our programmes are delivered by an extensive panel of experienced instructors — industry leaders and technical specialists who bring their real-world expertise of applying AI across the financial services, government and technology sectors into the classroom. Here are five of the many specialists who bring that knowledge and impact to your teams.

Dr Zoë Webster

With over 25 years in AI innovation, Zoë has led the development of cutting-edge technologies and built high-performing AI R&D teams, including an AI Centre of Enablement in a FTSE100 company. A recognised expert in AI governance, she has shaped policy, standards, and best practice, and was named one of the Top 10 Women in AI in the UK & Europe in 2024.

Matt Thornfield

Matt is an experienced technical instructor and software developer with expertise in AI-enabled development, modern engineering practices, and enterprise technology. His background spans Java, Spring, microservices, big data, distributed systems, and prompt engineering, helping technical teams build confidence and apply new skills in real-world settings.

Mike Weston-Burt

Mike brings over 40 years of Big Four experience and has coached more than 50,000 professionals across leadership and business contexts. He specialises in helping organisations make practical, strategic sense of AI, translating complex ideas into clear, actionable capability that supports productivity, innovation, and competitive advantage.

Nick Todd

Nick has over 25 years of experience delivering large-scale global training programmes for organisations including Citibank, Jaguar Land Rover, Rolls-Royce, and the BBC. A qualified teacher and experienced technical instructor, he specialises in AI, cloud computing, application modernisation, and DevOps.

Dejana Achelpohl

Dajana brings nearly 20 years of experience leading teams through major technology change at Google, PayPal, and DHL. She specialises in the people side of AI adoption, helping leaders build confidence in AI-ready leadership, change management, and strategic alignment.

Empowering global teams with future-ready skills

Neueda has been delivering AI and technology training to global organisations for over two decades, helping teams master the skills that drive real business impact. From AI and data science to engineering, cyber, and platform modernisation, our programmes are built by practitioners who understand your technology, your industry, and your people.

Flexible in delivery and outcome-driven by design, we equip enterprise teams with the tools they need to innovate, adapt, and lead in an AI-powered world.
