

Work Experience is a great success!

Attendance

Muhammed has been very punctual, arriving early on all days up to now and working consistently through office hours.

Behaviour

I have been impressed with Muhammed's professionalism, studiousness and creative ability. He gave a good first impression when meeting him on Monday and this has continued throughout the placement with us. Muhammed has worked well across all the tasks we have set him, showing an aptitude for hand-drawing as well as digital architectural drawing. We feel he is producing enough work to allow a day of work in our graphics department on Friday to experience another element of our practice.

Openness to Learn

Muhammed has shown a willingness to engage with all aspects of architectural drawing and work. He has also shown a willingness to learn multiple software packages – with no prior experience. We have spoken about the routes into the profession and the requirements to become an architect. Muhammed has also been interested in the work of the practice and has asked questions to myself and colleagues.

All in all, I am impressed with Muhammed's attitude and ability. I think it would be good for Muhammed to maintain an interest in Design and Architecture and continue to read and absorb information relating to the profession and design in general – I certainly think he has an aptitude for it.
