Fine Belgian Wallcoverings

HANGING INSTRUCTIONS [J]

IMPORTANT

Under normal conditions, this reference can be installed by applying the glue directly to the wall, and it is unnecessary to moisten the back of the wallcovering (see also hanging instructions enclosed). However, if this reference has been kept in storage for a long time, and/or if the installation takes place under very warm weather circumstances, it is advisable to first humidify the back of the wallcovering, in order to make the installation easier.
