Product Overview

Usage Instruction

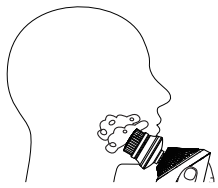

Shaving

Turn on the shaver, and let razor head moves over the skin in straight and circular motions.
* Please wash your hair with warm water before shaving, because it can soften your skin and hair. If you have long hair, please use the hair clipper to remove the long hair first.

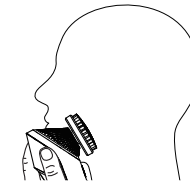

Deep Facial Cleaning

1. Turn off the shaver, remove the razor head, and install the facial cleanser.
2. Turn on the power and use the facial cleanser to make circular motions on the face to deeply cleanse the face.

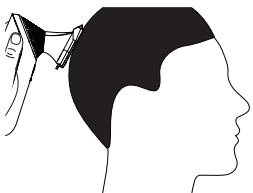

Facial Massage

1. Turn off the shaver, remove the razor head, and install the facial massage brush.
2. Turn on the power and gently place the facial massager brush against your face, the massager brush will vibrate to help relaxing your face muscle.

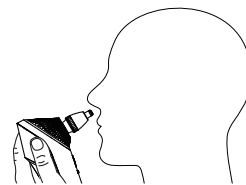

Hair-cutting

1. Turn off the shaver, remove the razor head, and install the hair clipper.
 2. Turn on the power, and let hair clipper slowly move over the hair.
- *The direction of movement of the hair clipper should be against the direction of hair growth.

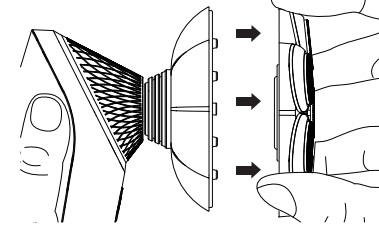

Nose Hair Removing

1. Turn off the shaver, remove the razor head, and install the nose hair trimmer.
 2. Turn on the power and insert the nose hair trimmer briefly and slowly into one nasal cavity, for turning the tip to remove excess nose hair.
- *The depth of the tip inserted into the nasal cavity should not exceed 0.5 cm.
*When trimming nose hair, make sure the nasal cavity is clean.

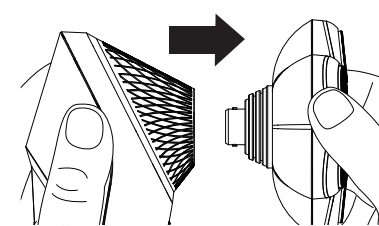

Installation Instruction

Remove and Install the Razor Net

The razor net is magnetic to the razor head, so you could take and install it easily.

Remove and Install the Razor Head

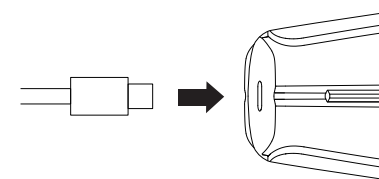

Grab the razor head and then pull it out.

Insert the razor head into the slots at the top of the shaver body, then press the razor head down until you hear a click.

Charge the Shaver

Charge the shaver with attached Type-C charging cable.

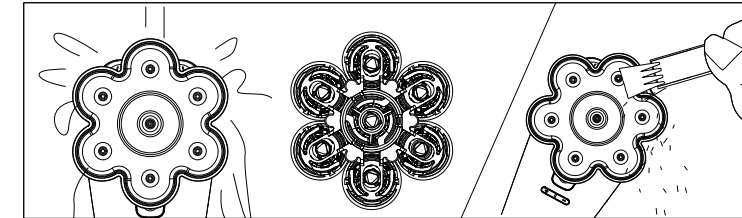

* Before charging, please make sure the power has set off. Do not charge the shaver for a long time.

Clean and Maintenance the Shaver

To ensure a better shaving experience, please clean your shaver regularly.

1. Remove the razor net and rinse the surface of the shaver with running water. You can also use the attached cleaning brush to wash together.
2. After washing, shake off excess water. Do not wipe the razor net with a towel or tissue as this may damage it.
3. Wait until the shaver is completely dry before using it.
4. You can put 1-2 drops of machine oil on the razor net to maintain the sharpness.

Important Safety Instruction

1. If the charging cable is damaged, it must be replaced with a new one to avoid any danger.
2. The charging and storage temperature of the shaver should be between 5° and 35°.
3. Make sure the charging cable and shaver is dry while charging.
4. Before cleaning the shaver, please unplug the charging cable.
5. Please keep the shaver out of reach of children.
6. If the shaver does not work, you could clean the beard or hair inside the shaver after turning off the power switch.
