Is a Rank Math Pro Free Download Legal? Understanding GPL

Absolutely. The answer is **YES, it is 100% legal** to use the file we provide. Here's the simple explanation:

Like WordPress itself, Rank Math is released under the GNU General Public License (GPL). The GPL license is the foundation of the open-source community, giving you the right to use, modify, and share the software freely.

When you purchase Rank Math Pro from the official developers, you are primarily paying for:

1. A **license key** for one-click automatic updates.
2. Access to their premium, **24/7 support team**.
3. Account-based services like **Content AI credits**.

The core plugin code itself is GPL. Therefore, we can legally share the original, unmodified Rank Math Pro plugin with you. This is completely different from a "nulled" version, which is illegally cracked software that often contains malware and can destroy your website's security and reputation. The file here is safe and clean.
