JHK PROFESSIONAL HIGH VISIBILITY

MAXIMUM SAFETY, PROFESSIONAL PERFORMANCE

At JHK Professional, we understand that safety is non-negotiable. That's why we develop our high-visibility garments with a clear goal: to protect professionals in the most demanding environments, without sacrificing the comfort or durability that define our brand.

Each garment - vests, T-shirts, jackets, sweatshirts, polos or trousers - is designed using high-intensity fluorescent fabrics and premium reflective bands, ensuring superior visibility both day and night.

At JHK Professional, we go even further:

- We comply with international safety standards.
- We ensure comfort for long working hours.
- We manufacture breathable, lightweight fabrics.

With JHK Professional, your team works safely, comfortably and with the quality your company deserves.

ICONOGRAPHY

BOXES

Number of garments per box.

WATER-RESISTANT

Special treatment that minimizes the erosive effect of water on the fabric of the garment.

PADDED

Garment with padding material between two textile layers.

PACK

Number of garments per pack.

REVERSIBLE

Garment designed to be worn on both sides.

BREATHABLE (BIRD-EYE)

Breathable, lightweight and comfortable fabrics.

WATERPROOF

Fabric designed to repel water.

TRIPLE LAYER

Triple-layer softshell.

DETACHABLE

Detachable sleeves.

UNISEX

For women and men.

HEAT-SEALED SEAMS

Heat and pressure applied to ensure waterproofing.

EUROPEAN PROTECTION STANDARDS

EN ISO 20471

HIGH VISIBILITY

This is the international standard that ensures a high-visibility garment provides the highest level of protection in low-light or reduced-visibility conditions.

Pictogram number	CLASSIFICATION		
	CLASS 3	CLASS 2	CLASS 1
Background material surface area	≥ 0,80 m ²	≥ 0,50 m ²	≥ 0,14 m ²
Retroreflective material surface area	≥ 0,20 m ²	≥ 0,13 m ²	≥ 0,10 m ²

EN ISO 17353

ENHANCED VISIBILITY

This is the international standard that specifies the requirements to improve user visibility in limited-light conditions (dawn, night, bad weather) in medium-risk environments.

Type B for dark conditions	
Class B2	Reflective material on limbs
Class B3	Reflective material on the torso or on the torso and limbs

EN ISO 343

RAIN PROTECTION

This standard applies to protective clothing against adverse weather conditions: rain, snow, fog, and humidity, always at temperatures above -5°C.

EN ISO 14058

COLD PROTECTION

This standard applies to garments designed to protect the user in cold environments between -5°C and 10°C.

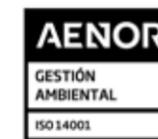

EN ISO 13688

PROTECTIVE CLOTHING

This standard establishes the general requirements related to ergonomics, safety, size designation, ageing, compatibility, and marking of protective garments, as well as the information that the manufacturer must provide with protective clothing.
