3. Sharing and Learning Workgroup (NEW)

We are looking to bring together the knowledge & experience of the Joined-up Thinking and Alerts & Moments members along with their passion for sharing and learning to create a super workgroup 'Sharing & Learning'

(INCIDENT OR GOOD PRACTICE) LESSON SHARED / IDENTIFIED

Alerts and Moments

Joined-up Thinking

Safety Alert

Give details of events surrounding an incident or near miss and provide good practice guidance in order to prevent similar issues.

Safety Moment

Downloadable PowerPoint presentation or animation detailing an incident, near miss or good practice, and which provide discussion points and related resources for use as learning tools.

High Value Learning

Details of events surrounding incidents / near misses with Major Accident potential and provide good practice.

Safe Space Discussion

Opportunity to hold a meeting to discuss learnings from incidents in more detail.

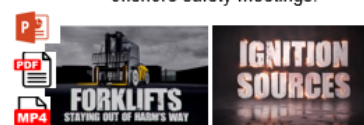

Joined-up Thinking Packs

Informative and interactive pack takes around 30 minutes to deliver.

They consist of a short film that highlights industry best practice, easy to follow speaker notes and a special bulletin that provides more detail about the incident covered in the video.

The packs cover a wide range of subject matters and are suitable for use in onshore and offshore safety meetings.

LUMA1 Learning

Learning management tool harnessed to create online interactive resources or e-modules from existing resources.

Also used to translate and subtitle resources.

How can you #playyourpart?

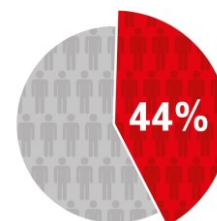

- Join the sharing and learning workgroup or find out more (aimie@stepchangeinsafety.net)
- Share learnings or good practice with Step Change in Safety
- Circulate and share the safety resources made available
- Provide feedback on resources and content

4. Process Safety Workforce Survey is now LIVE

The member-wide survey, aimed at our offshore and onshore energy workforce is now closed:

- [2000 responses](#)
- [90 Organisations](#)
- [3,500 free text comments](#)

High level results from this survey and how they compare to the Process Survey Leadership survey will be presented at the Offshore Safety Awards. An industry report will be published in Q3, and the individual member reports will follow.

44% of all fatalities in Oil & Gas industry are due to process safety events

5. Wellbeing Survey

We're proud to work with IADC North Sea Chapter's Mental Health Task Force and the Marine Safety Forum to identify how we can help improve the wellbeing of the energy industry's workforce.

To help organisations launch the [survey](#), a communications pack containing supporting materials (presentation, poster, 50 second film and QR code) has been created and is available to download from the focal point page and the [wellbeing page](#).

Please email gillian@stepchangeinsafety.net if you have any questions.

6. Tea Shack News (TSN)

LIFE AFTER AN ACCIDENT

An interview with Paul Blanchard

Paul Blanchard worked in the construction industry for nearly 40 years; 25 of those successfully running his own building business, largely developing and renovating properties. On Sunday 18 July 2010, whilst working on a roof at a farm, Paul fell from a height of 12ft. Suffering life-threatening injuries, he spent three months in a medically induced coma and six months in hospital. The accident left him paralysed and he now relies on a wheelchair.

Now a professional Motivational and Behavioural Speaker, Paul delivered an honest and thought-provoking account of his 'Life After an Accident' at our Safety Rep Forum (see page 6 for more information on the event). He spoke not only about the incident but, more significantly, about the consequences; and how it affected him physically, mentally and financially. And how his accident affected his family. Paul gave a deeply personal account of his story, talking openly about the incident, the realisation of how much his life had changed and his determination to adapt.

"I went from 6' 2" to 4' 4" overnight. There was physical and financial pressure put on my family and friends, taking on the responsibilities that I could no

longer do – something as simple as walking our dog, or taking the bins out."

Paul's drive and motivation to keep others safe across all industries is inspiring, focusing on the emotional perspective of Health & Safety and the empowerment of the workforce to take responsibility for both their own safety and that of their colleagues.

"Always come back to the risk assessment, do the analysis. If you think this doesn't feel or look right, say 'No'. Don't be intimidated, whether that's by a customer, your boss or peer pressure. If you're not comfortable, don't go ahead. Put boundaries on your own wellbeing, if you feel that there's a potential risk to yourself or your colleagues."

Paul delivers over 20 presentations throughout the year to some of the largest construction, energy and industrial companies in the UK. He collaborates with employers, managers and experts to foster a positive and open safety culture, that sees the benefits of encouraging near-miss reporting (which Paul refers to as "near-hits" reporting), sharing safety performance, thorough pre-job and on-the-job planning, as well as training and competence.

Our audience was captivated from start to finish, and the take-away message was clear to everyone: look after yourself and look after others, because safety is everyone's responsibility.

Paul Blanchard is an Ambassador for No Falls Foundation and RoSPA. He was presented with a RoSPA Guardian Angel Award in 2015.

Find out more about Paul's work and his story:

#playyourpart

- Released Quarterly
- [Issue 6 now available](#)
- Electronic format (can be easily printed at site)
- [Slides](#) for canteens, receptions etc are also available to download from the [Focal Point Resource](#) area
- Distributed to Focal Points and registered users of website
- Available for download from [website](#) and [Focal Point Resource](#) area

Please distribute the electronic copy to all safety reps, OIMs, site leaders and networks and consider printing off a few copies for canteens, tea shacks and notice boards.

This quarter's issue includes:

- An interview with Paul Blanchard, keynote speaker at our recent Safety Rep event who was paralysed after a fall from height
- E-obs feature – how the electronic observation card system works at site
- Sleep Smarter Series: Switch Off for a Better Sleep
- Safety Smarts: interactive quiz, sudoku, general knowledge and crossword

We need you to help us find people who are willing to write articles or be interviewed. Please contact gillian@stepchangeinsafety.net for more information or to submit ideas.

7. Support Team

Nicola Taylor joined the team on 1 April, as Business Engagement Manager. She has extensive energy industry experience and a background in HSE, Communications, Events and Project Management having held positions with Stork, Sparrows Group (now Altrad Sparrows), the Society for Underwater Technology (SUT) and Expro.

From July 2024, Nicola will be the main point of contact for Step Change in Safety Focal Points

nicola.taylor@stepchangeinsafety.net

8. New Members

A warm welcome to our new members:

10. Q2 Focal Point Engagement Session

The Q2 Focal Point Engagement session took place 14th May @ Annan House and was well attended by member Focal Points and delegates.

Q2 Focal Point Session - Agenda

- Welcome and Introductions
- Safety Moment
- Mission and Support Team
- Quarterly Themes Overview and Live Feedback with Menti
- Workgroup and Project Updates
- Events
- AOB

Slides and supporting material from previous sessions can be viewed in the [Focal Point Network Teams site](#).

The date for the Q3 engagement session is yet to be confirmed – invitations will be issued when confirmed.

If you would like to share / present a safety moment or add an agenda item for the Q3 session, please contact aimie@stepchangeinsafety.net.
