

15m Fall Arrest Device

The 15m Fall Arrest Recovery Device is designed to provide fall protection when working at height.

Anchored above the user, it gives the user a safe area of work. The retracting line pays in and out of the device as the user moves. In the event of a fall, a brake engages, arresting the fall of the user with a controlled deceleration force. This device has a swivel anchor eye on top.

The 15m Fall Arrest Device has an integral winch mechanism, so in the event of a fall, the top man will be able to raise or lower the user to a safe area. It can be mounted onto Tripods and arms for access and egress from a confined space - please ask for more information.

Features & Benefits

- ✓ For users weighing up to 150kg
- ✓ Fall protection for up to 15m
- ✓ Raise or lower users to a safe area

Key Applications

- ✓ Confined spaces
- ✓ Basements
- ✓ Shafts
