

Dustex Attix 30-OH

The Dustex 30-OH is a light but rugged H Class vacuum for site cleaning and on-tool extraction. Whilst it can be used as an on-tool extractor, it does not have on-tool power take-off.

The vacuum incorporates a semi-automatic cleaning system, triggered by hitting a button on the machine during operation. This uses a pulse of air to clean the dust from the dirty side of the filter, preventing it from clogging up whilst in use. The correct airflow for each task is set by selecting the appropriate dial setting.

An audible & visual alarm will indicate when the wrong setting has been selected, the filter is full, or the hose is blocked. Dust is collected in bags within a 70ltr hopper. When vacuuming liquids, either a plastic bag or no bag should be used.

Features & Benefits

- ✓ H class filtration
- ✓ Wet & dry vacuuming
- ✓ Semi-automatic filter cleaning
- ✓ Use for on-tool extraction
- ✓ Anti-static
- ✓ 110v 16a

Key Applications

- ✓ Construction dust
- ✓ Hazardous dust
- ✓ Wet dust & liquids

Not for use with Asbestos dust

DUSTEX®

Dustex Attix 30-OH

Technical Specifications

Maximum Airflow	3,200 l/m
Pressure	23,000Pa
Motor Size	1.15KW
Voltage required	110v
Socket required	16a
Running Current	16 amps
Length	450mm
Width	380mm
Height	595mm
Weight, including filters	10Kg
Collection Tank	30ltr
Noise Levels*	59 DbA

Accessories

On-Tool Extraction	3.5m 36mm hose c/w Universal adapter
Anti-Static Vacuum Wand Set	3.5m 27mm anti-static hose Stainless steel curved hand tube Stainless steel extension Vacuum Wide Floor Foot
Deep-Cleaning set	Crevice nozzle
Width	Brush nozzle

Filtration

H Class	Washable filter media
30 Litre Collection Hopper	Suits 30ltr bags
