

Climex Air Distribution Kit 300

The Warm Air Distribution Kits are designed to assist with even heat distribution. Air movement is critical to an effective drying out programme and working with an indirect oil fired heating solution, these kits very effectively ensure warm air is distributed through the required areas.

They ensure maximum and consistent heat coverage is maintained and ensure that any 'dead areas' are effectively and evenly dried out. The fan can be connected up to 30mtrs of flexible ducting.

Depending on the heating set-up, the fans can be used to draw heat from a riser or similar, and direct into specific areas, where a concentrated heat is required.

Key Product Features

- ✓ Airflow rating of 3500m /hr free air
- ✓ Stackable to save storage space
- ✓ Powerful 0.75kw 110V / 240V motor
- ✓ Can be used with up to 38m of flexible duct

Key Applications

- ✓ Air movement
- ✓ Can circulate warm dry air in order efficiently dry out a building

CLIMEX®

Climex Air Distribution Kit 300

Technical specifications

Size	305 mm
Weight	15 Kg
Height	533 mm
Length	432 mm
Width	355 mm
Airflow m ³ /h	3500
Power	0.75Kw / 100V or 240V
